## ABSTRACT OF THE DISCLOSURE

In the automobile sun visor of the present invention, a body of the sun visor is placed on a shaft connected to a bracket fitted to a ceiling surface of a cabin of the automobile body in a rotatable manner. A bearing member into which the shaft is inserted is provided on an end portion of the body. On the bearing member, a communicating member coming into contact with a stopper provided on the shaft is provided. A key shaped groove which can pass through the stopper is engaged with the stopper at a place deviating from the rotation range of the body to insert the shaft into the bearing member.
